

Power lines already are so noisy that trying to use a AM RADIO while driving most of time it is noise from Insulators Tranformers & BAD GROUNDS (BONDS TO EARTH) that the POWER CO.'S refuse to change till it blows apart. ONLY WITH ARRL & FCC'S HELP WILL THEY DO ANYTHING AT ALL! THEN IT'S ABIG DEAL (DID YOU A FAVOR). THEY WOULD HAVE TO TRIPLE THE MANPOWER TO GET ALL THEY HAVE NOT DONE MAINTENANCE ON.
